

Product Specification for Thermometer 9250

Product Description : Thermometer with simultaneous Deg F and Deg C indication

Application : Swimming Pool water and Hot Spa temperature measurement

Product Specification :

A) Measurement

- a) Weight : Approximately 0.15Kg net
- b) Outside dimension : L100mm x W90mm x H130mm

B) Electrical Features

- a) Simultaneous Deg F & Deg C indication
- b) 2 Digit Display for Deg C (from 0 to 99 Deg C, theoretical indication)
- c) 3 Digit Display for Deg F (from 0 to 210 Deg F, theoretical indication)
- d) Durable Working temperature range :
 - Deg C : from 0 to 45 Deg C
 - Deg F : from 0 to 113 Deg C
- e) The temperature measurement would activate every 10 sec and show a new data. There is a reasonable time delay in response when compared with temperature displayed versus actual temperature at a specific moment, particularly when the temperature of the measure object is fluctuating.

C) Material and Composition

- a) It is operated with 2 button cell battery of A76/LR44 each if 1.5V DC
- b) The unit is composed of General purpose ABS 94HB grade, with transparent window for temperature display, of which is indicated by a LCD display

D) Packaging

- a) Packed with Blister Upper and Lower shell with Blister Card inside
- b) The entire Blister Pack is then bulk packed to Master Carton
