

Y-200 Series™

ELECTRONIC BOILER CONTROLS

Electronic Boiler Sequencers and Outdoor Reset Controls

The Y-200 Series digital electronic boiler control is a microprocessor-based boiler management system designed to control either single or multiple boilers or stages. Ideally suited for use in hydronic heating and domestic water supply applications, the Y-200 Series has been engineered with the flexibility and power to satisfy the most demanding control situations. Utilizing a state-of-the-art PID algorithm, the Y-200 Series minimizes operating costs by maximizing system efficiency and performance.

Standard Features

- 4 or 8 stages per control
- Scalable to 40 zones
- LCD digital display with viewing window
- 365-day time clock
- Water sensor
- Air sensor
- UL and cUL listed
- Manual override
- Password protection
- LonWorks® ready
- RS 485 port
- Outdoor installation
- Audible local alarm - 89 dB

Programmable Features

- Outdoor reset ratio
- Outdoor reset disable
- Outdoor cut-off
- Alternate setpoint
- Minimum water temperature
- Maximum water temperature
- Night setback
- Morning boost
- Automatic / Manual lead-lag
- Boiler / stage delays
- System pump control
- Boiler pump control (standard on all Raypak boilers)
- Low-temperature selection - heat pump

Options

- LonWorks module (plug-in)
- 4-20 mA / 2-10 VDC remote setpoint module (plug-in)
- Modem module (plug-in)
- Remote alarm bell – 3" or 4"
- Direct programming CD for flash memory update
- Up to 3 auxiliary relay boards (plug-in), e.g.:
 - Motorized louver
 - Combustion air blower
 - Draft inducer

Specifically designed to operate with Raypak Raytherm®, Hi Delta® water heaters and boilers, only Raypak and its representatives can provide the security of SINGLE-SOURCE ACCOUNTABILITY. Designed and manufactured by Raypak, the Y-200 Series is backed by over 50 years of technical innovation and proven quality.

Raypak, Inc. reserves the right to make product changes or improvements at any time without notification.

Y-200 Series Electronic Boiler Control

Dimensions are in inches.

Standard Components

Master control board
Indoor/Outdoor housing
Control stages
• 4 – Model Y-241
• 8 – Model Y-281
Pump relay
Program / Display pad
Outdoor ambient temperature sensor
Water temperature sensor

Ambient Conditions

Control: -40 to 175 °F (-40 to 79 °C)
Sensor: -65 to 300 °F (-54 to 149 °C)
Humidity: 90% non-condensing

Enclosure

Outdoor NEMA 3R rated (rainproof)

Programmable Control Parameters

Control range: 40 to 235 °F (Accuracy +/- 1°)
Control band: 0.5 to 10 °F
Pump off delay: 0 to 10 min.
Boiler on delay: 0 to 10 min.
Stage on delay: 0 to 10 min.
Outdoor cut-off: 32 to 200 °F
Outdoor cut-off deadband: -1 to -10 °F
Lead-lag: 001 to 100 hours
Reset ratio: 0.01:1 to 8.00:1

Electrical Characteristics

120 VAC, 0.5 Amps, 60 Hz

Limited One-Year Warranty
