A cool new app for spas

GECKO®

Compatibility requirements

In.touch module:
Model: 0608-521012   IN.TR-IT-P1-P2-P3-P4-CO
Model: 0608-521011   IN.TR-IT-P1-P2-P3-P4-P5

Compatible spa controllers:
in.xm2, in.xe, in.ye, in.yj and in.yt
with compatible software revisions.
In.touch application:

iPod touch
(3rd generation and later)
iPhone (3GS and later)
iPad
Requires iOS 5.0 and higher
Android 2.2 and higher,
compatible with Google Play

Warning: Routers blocking broadcast messages and/or using WEP encryption are not compatible with the in.touch.

Installation Tips

- The unit must be installed as high as possible, under the skirt, at least 12" (30 cm) away from any metal component or structure. This is necessary to ensure proper signal transmission.
- The in.touch module should be installed as close as possible to the house to optimize the signal strength. It is recommended to install the side of the spa with the in.touch module facing the house. In some cases, it will be necessary to relocate the unit once the spa is installed in the yard.
- We recommend that you install the unit with #8 PAN head screws.
- Route the cable and leave some loose, so the in.touch module can be moved in case of reception problems.
- Installing the in.touch module in a corner of the spa may help to avoid metalic components within the proximity of the in.touch module.

The in.touch module has a built-in WiFi transceiver that allows you to communicate with your favorite devices. The following steps will show you how to connect with your spa.

Set up

Download application

in.touch world allows you to use the Internet anywhere in the world to control your spa.

in.touch home allows you to control your spa using your home WiFi network.

Both versions of the app are waiting for you at the App Store for iOS devices and the Google Play Store for Android devices — search for gecko in.touch then click on the version you want to install.

Set the point-to-point connection

For the first use, you must connect directly to the in.touch module using an iOS device or a computer with in.touch PC Setup or in.touch Mac Setup. After the connection has been established you can use your home WiFi network if you wish.

iOS device

1. Connect to the in.touch network in WiFi settings on your device
2. Start the in.touch application by tapping on it
3. Add your spa when prompted

Android users

1. Download in.touch PC Setup.exe or in.touch Mac Setup.zip onto your computer.
   (file can be found at www.geckoalliance.com/intouch).
2. Take your computer as close as possible to your spa and connect to the in.touch WiFi network.
   (No network other than WiFi should be active, to ensure functionality of the software.)
3. Install software (PC) or unzip file (Mac).
4. Follow the on screen instructions.
5. Choose the same network for your Android as you did for your in.touch.

Start the application

Find the icon for the in.touch application, then tap on it to open it. You must add your spa to the list in order to configure it and use it with the in.touch app. Choose your spa from the list of Visible Spas, and name it (eg. Home).

You are now able to use the in.touch app with your spa.

iOS users should continue to the next step for WiFi configuration.

Configuration (iOS users only)

1. Go to Settings in the in.touch app and select WiFi Connection.
2. Choose the network that you want your spa to connect to (i.e. your home WiFi). If the network has a passcode, enter it when prompted.

As long as all hardware (router etc) and passwords remain unchanged you will not have to repeat this process.

Home network

Go to the WiFi settings section on your iDevice and choose the same network (if your device does not connect automatically).

Internet (world edition only)

If your iDevice has direct acess to the Internet (i.e. 3G or 4G connection), it will connect automatically.

If you would like to use WiFi and it does not connect automatically, go to the WiFi settings on your device to connect to your desired network.

A green icon with the word "Linked" beside it will appear at the top right hand corner of the My Spas page to confirm your connection.
